

Take a new perspective...

TUS 2000™

Quick-change Cover System

Is your cabin interior suffering a mid-life crisis?

How would you like to be able to refresh the image of your cabin interior whenever you choose with a change of style, a seasonal change or a mid-life upgrade if it's beginning to look 'tired'?

At the very least you want to ensure that it stays as smart and appealing as you designed it to be.

You wouldn't wear the same suit of clothes everyday, or sleep in a hotel where they didn't change the bed sheets for months.

Would you? So, realistically, how often do you clean or change aircraft seat dress-covers?

The reality used to be that as hundreds of passengers sat in your stylish cabin the seats became scruffy and spoiled your image - but operational imperatives meant there was nothing you could do about it.

The TUS 2000™ Quick-change Cover System gives you back control of your cabin interior appearance. It gives you the flexibility to set your imagination free in a totally new way.

TUS 2000™ is the Total Upholstery Solution

The TUS 2000™ Quick-change Cover System can be used with any or all of our other products. It allows you to mix and match them to create an Integrated Upholstery System to any specification, but one that is also totally flexible because it can be changed when you choose, not only when operational considerations dictate.

Operational factors make the idea of changing conventional dress-covers a potential nightmare: all that time on the ground, all that money, plus the fact that, unless skillfully re-fitted, even clean or new covers may still look scruffy.

What have we changed?

We have redesigned the dress cover so you can exchange just those parts that get the most wear: the seat bottom and backrest covers, not the sides or reverse.

We've replaced imprecise, awkward Velcro fittings with simple 'click-on/click-off' fixing points that hold the cover in exactly the right place. This reduces change-out time to under 1 minute and gives a perfect result - no matter how unskilled you are. *(Compared to a 20 minute struggle with a conventional cover.)*

The result:

- outstanding appearance and comfort
- massive savings in down-time, labour and cleaning costs
- operational constraints are virtually eliminated.

TUS 2000™ gives you back control of your cabin interior appearance.
